

ISLAND TIME

"Successful kitchen refurbishments call for creative design solutions that resolve the shortcomings of the old kitchen and breathe new life into the home. The owner had lived in this home since it was built 18 years ago and wanted a contemporary design to replace the dated timber kitchen. So we decided to open up the space and introduce an island bench. However the greatest challenge was to work within the existing structure – the house was built on a concrete slab, which meant that the plumbing and electrical conduits to the island bench had to be chased into the floor. The kitchen is now a large and functional area with an abundance of storage. We employed a clean-lined aesthetic and bright finishes to blend with the existing features of the house, as well as adding a burst of colour to the glass splashback and new stainless-steel appliances and fittings."

Designer: Michael Attard for Attard's Kitchens & Cabinetry

EXPERT TIP

Employ planning ingenuity and contemporary design to reveal the full potential of your new kitchen.

We love inspired and streamlined design with a splash of colour.

SHOP THE LOOK

- **Cabinetry** Flat panel semi-gloss polyurethane
