

## ATTARD'S KITCHENS & CABINETS

# BALANCED DESIGN

SIMPLE AND SOPHISTICATED

When looking at this kitchen one word springs to mind: impressive. Not only is this room a generous size, it also accommodates the precise needs of the homeowners, who requested an open-space that was modern and light, with plenty of storage.

The original kitchen was a restrictive design with one entry and exit point, which inhibited the flow of movement from the kitchen to the dining and living areas. The space also had insufficient storage room for the clients' needs.

Opening the flow of the kitchen to the rest of the home and increasing the storage potential was therefore the company's prime consideration during the renovation. The team also endeavoured to lighten up the room with the addition of coloured glass splashbacks and white cabinetry.

The sleek and modern design was devised by Michael Attard from Attard's Kitchens & Cabinetry. Following a contemporary aesthetic style streamlined the design, making it easy for the company to fulfil the homeowners' requirements. By including a large corner island bench, the company was able to offer a stylish solution to a common problem.

The kitchen also features a combination of brown silk granite and stainless steel benchtops with timber capping to generate warmth in an otherwise white kitchen. To increase storage, Michael installed a large pantry and appliance cabinet, as well as adding detail by incorporating an open shelf above the cooktop and below the island bench.

Complete with modern stainless steel appliances and brushed stainless steel handles, this kitchen has clean-cut lines and a bright modern finish.

For this project, the homeowners enlisted the help of Attard's Kitchens & Cabinetry to renovate their dark and dated kitchen. The company was given a brief to lighten up the space and include extensive and efficient storage.

To achieve this, Michael incorporated bi-fold lift doors above the cooktop and a spacious pantry with internal drawers. LED strip lighting was also strategically placed under the luna white benchtops to ensure the area would remain bright at night.

Michael incorporated coloured splashbacks and brushed stainless steel laminate kickboards to ensure the design remained visually consistent.
